Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4, 6, and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Purcell.

Purcell shows a method for controlling the collection, processing and dissemination of information by a host regarding product and service (industrial property) availability. The method includes the steps of establishing a host (network) operated information management system wherein the information management system is a computer having information processing and storage capabilities. The host also has electronic communication connections such as

Art Unit: 3627

modems that permit third parties to electronically connect with the information management system for exchanging information therewith. Host approved (licit) sellers of products and services are granted limited electronic access to the information management system so that each approved seller (trader) then has a self-initiated capability to exclusively access that seller's inventory information (search server) that is maintained on the information management system for adding, amending and deleting portions of the seller's inventory information. The seller's inventory information is analyzed and assimilated into a buyers listing of products and services available through the information management system to potential buyers. Host approved buyers of products and services are granted limited electronic access to the information management system so that each approved buyer has a self-initiatable capability to access the buyers listing for reviewing products and services of interest to that buyer. (abstract)

Easy access is provided to the host Internet site to the sellers and buyers (terminals are "installed" anywhere there is internet access including patent offices), each of whom may access the host site upon their own initiative remotely through an Internet access provider of their choice. Because this preferred embodiment operates within the framework of the Internet, the system is substantially continuously available to a plurality of sellers and a plurality of buyers (column 4, lines 42-49)

The present invention finds utility in businesses and industries requiring the controlled exchange of inventory information. (more evidence of "industrial property") These inventories may include both products and services with the

management of the same being accomplished in any processing environment, but particularly in computer settings. (column 11, lines 47-52)
